SCHOOL OF MEDICINE

Multidisciplinary Global Health Research Seminar Series

Monday, April 27, 2015

12:00 pm to 1:00 pm

School of Dentistry (530 S Wakara Way)

Lecture Hall 2110

Bacteriophages—their role in engineering and medical applications

Presented by:

Dr. Ramesh Goel, Associate Professor

**Civil & Environmental Engineering
University of Utah**

Dr. Ramesh Goel is an associate Professor of Environmental Microbiology in the Department of Civil & Environmental Engineering at the University of Utah. His primary research interests include the application of molecular tools in solving engineering as well as health related problems. He researches in water sustainability, microbiological quality of drinking water, water quality of surface waters and bacteriophages. Currently, he has been investigating the role of bacteriophages in the environment. For example, he is looking into phage therapy for various medical problems such as antibiotic resistant

bacteria. Under his hobby, he likes to cook and offer Indian cooking classes for free.
